HOD DESK

Greetings to Dear students, Faculty and Friends!

Last few months have been very hectic for us. Everybody in the department was actively involved in academic calendar completion. It is also the time we are bidding farewell to our final year students. They have spent last four years most productively and are raring to go outside and face the challenges offered by corporate around the world. The college has instilled them good social and cultural values along with their technical aptitude and I am sure they will stand out among their peers with these qualities. I wish them success in all their endeavors and exhort them to participate actively in alumni association. It is good to see that our SAE - Formula 4 car still in the news with very prominent article in "Vanitha". I am sure that coming years will see more of such productive activities from the department.
